LICS2021

36th Annual Symposium on Logic in Computer Science
29 June – 02 July, 2021
Online

Thank you for your registration at the 36th Annual Symposium on Logic in Computer Science – LICS 2021 scheduled to take place online between 29 June – 02 July, 2021

You can find the program on the conference website:
http://easyconferences.eu/lics2021/program/

Conference Format

The program will be updated and will contain links to your papers and talks.

Participants will be expected to see the talks and/or read papers before the attend sessions.

The conference will be conducted virtually using the Zoom platform.

Each session will be conducted as follows (per paper)
- o Quick reminder/summary (3 min) of the paper
  (you will be able to share screen and show slides) and
- o Questions & Answers for 7 minutes, moderated by session chair.

*Please note that all sessions will be recorded.
**More information/instructions to presenters and the relevant links will be sent closer to the conference

Pre-recorded Video – Production & Submission

Based on the format of the conference, presenters are asked to submit a pre-recorded video of their presentation. The video will be uploaded on YouTube (unlisted*) and linked on the conference program.

it does not appear in search results. It can be viewed only through the direct link

Required video format:
Format: FLV, MP4, WMV or MOV

Length: 15 minutes

Instructions on how to record your talk (including voice over)

1) Zoom (with video) – Recommended
   • Follow the <u>instructions here</u> for recording using Zoom.

2) PowerPoint:
   • First record your voiceover following <u>these</u> or <u>these</u> instructions
   • Then export your video including narrations following <u>this guide</u>
   • On export select Full HD (1080p) as video quality

3) Keynote:
   • First record your voice over following <u>these instructions</u>
   • Then export your slides via File > Export To > Movie …
   • in the following export dialogue set "Playback" to "Record Slideshow" and "Resolution to "1080p".
   • Alternatively, you can also record your full screen or a screen region by pressing cmd + shift + 5 instead of using the keynote voice over tools.

4) OpenOffice, Google Slides or Latex (PDF):
   • If you happen to use OpenOffice, Google Slides or Latex (PDF), you can simply record your screen (including audio) using a screencast tool
   • There is a multitude of tools out there, a good starting point for finding your preferred tool might be this <u>article</u>. There are many other alternatives.
     o MacOS: a screencast software is integrated into the system and accessible via the shortcut "cmd + shift + 5"
     o Windows: starting windows 10, there is an integrated screencast tool too (depending on your windows version "windowskey + G" might work)
     o Linux: depending on your distribution there is a variety of easy to install screencast tools available, according to this recent <u>linklist</u>.

Pre-recorded Video –Submission

<u>Option 1:</u>
Please upload your video here:
https://drive.google.com/drive/folders/18D_gTf7WqDqqOXRDrioD5jYtftyDF62P?usp=sharing

<u>Option 2:</u>
Send the video through We Transfer (www.wetransfer.com) to info@easyconferences.eu

Deadline

<u>The video must be submitted before 7 June 2021</u>

You can find here helpful hints regarding live/pre-recorded presentations.
