

List of Papers

1.	Application Of Gene Expression Programming To A-Posteriori Les Modelling Of A Taylor Green Vortex	Maximilian Reissmann, Josef Hasslberger, Richard Sandberg, Markus Klein
2.	A Sub-Grid Activity Sensor Applied To A-Posteriori Les Modeling Of Laminar-Turbulent Transition	Josef Hasslberger, Markus Klein
3.	Microbubble-Laden Flows With Bubble Breakup And Coalescence: An Euler-Lagrange Les Study	Michael Breuer, Felix Hoppe
4.	Thermal Mixing Processes In Horizontal And Vertical T-Junction Configurations	Cenk Evrim, Eckart Laurien
5.	Pitm Simulations Of Passive Scalar Transport Fields In Turbulent Flow At Low, Medium And High Prandtl Numbers	Bruno Chaouat, Roland Schiestel
6.	Determination Of Numerical Errors In Les Of Turbulent Rayleigh- Bénard Convection	Sahin Yigit, Josef Hasslberger, Markus Klein, Philipp Wenig
7.	Assessment And Comparison Of Large Eddy Simulations In Asymmetrically Heated And Highly Turbulent Channel Flows	Martin David, Adrien Toutant, Françoise Bataille
8.	Simulation Of Multiphase Turbulent Channel Flow Modulation By Polymer Additives	Lee Mortimer, Michael Fairweather
9.	Advanced Rans And Hybrid Rans/Les Simulations Of A Turbulent Boundary Layer Under Pressure Gradients	Jaime Vaquero, Nicolas Renard, Sébastien Deck
10.	Aerodynamic And Aeroacoustic Investigation Of A Circulation Controlled High-Lift Wing By Zonal Overset-Les	Rinie Akkermans, Varun Bharadwaj Ananthan
11.	Large-Eddy Euler-Lagrange Simulation Of Breakup Of Dry Powder Agglomerates Due To Fluid Forces And Wall Impact	Ali Khalifa, Michael Breuer
12.	Secondary Flow Effects On Preferential Concentration And Clustering Of Inertial Particles In A Turbulent Square Duct Flow	Yanzhi Wang, Michael Fairweather, Lee Mortimer, Yanlin Zhao, Jun Yao
13.	Development Of An Effective Stochastic Collision Method For Use In Four-Way Coupled Turbulent Flows	David Rupp, Lee Mortimer, Michael Fairweather
14.	A Novel Generalized Multifluid Modelling Approach For The Simulation Of Multiphase Flows: Model Development And Validation	Marco Colombo, Andrea De Santis, Bruce Hanson, Michael Fairweather
15.	A Novel Generalized Multifluid Modelling Approach For The Simulation Of Multiphase Flows: Application To Intensified Liquid-Liquid Extraction	Andrea De Santis, Marco Colombo, Bruce Hanson, Michael Fairweather

16.	Aerodynamic Performance Of Biomimetic Wings In Soaring Flight - A Numerical Study	Eike Tangermann, Gianantonio Ercolani, Markus Klein
17.	Development And Validation Of Explicit Algebraic Reynolds Stress Modelling For Hybrid Rans-Les Computations	Matteo Montecchia, Stefan Wallin
18.	Computational Modelling Of Vegetation In Urban Areas And Its Impact On Air Quality, Temperature And Velocity'	Azin Hosseinzadeh, Amir Keshmiri, Andrea Bottacin Busolin
19.	Use Of 2-D And 3-D Unsteady Rans In The Computation Of Buoyant Flows	Constantinos Katsamis, Timothy Craft, Hector Iacovides, Juan Uribe
20.	Energy Budgets And Performance Development Of Turbulent Boundary-Layer Control On Airfoils	Georg Fahland, Alexander Stroh, Davide Gatti, Marco Atzori, Ricardo Vinuesa, Philipp Schlatter, Bettina Frohnäpfel
21.	Skin-Friction Contributions Modified By A Large-Eddy Break-Up Device	Chi Ip Chan, Cheng (Rey) Chin, Ramis Örlü, Philipp Schlatter
22.	Modelling Of Turbulent Kinetic Energy Equation In Spherical Shock-Turbulence Interaction	Song Fu, Boxuan Chen, Bowen Yan
23.	Dns Study Of Turbulent Heat Transfer In A Channel Under Combined Influences Of Buoyancy And Wall-Normal System Rotation	Cale Bergmann, Bing-Chen Wang
24.	Simultaneous Flow, Flame And Wall Temperature Measurements In An Ic Engine For The Investigation Of Flame-Wall Interactions	Carl-Philipp Ding, Marius Schmidt, Andreas Dreizler, Benjamin Boehm
25.	Riblets In The Rough Regime	Lars H. Von Deyn, Davide Gatti, Bettina Frohnäpfel
26.	Detached Eddy Simulation Coupled With Steady Rans In The Wall Region	Lars Davidson
27.	Modification Of The Ssg/Lrr-Omega Rsm For Adverse Pressure Gradients Using Turbulent Boundary Layer Experiments At High Re	Tobias Knopp, Matteo Novara, Erich Schuelein, Daniel Schanz, Christian Willert, Andreas Schroeder, Nico Reuther, Rainer Hain, Christian Kaehler
28.	Injection Of Wind Gusts In Large-Eddy Simulations	Michael Breuer, Guillaume De Nayer
29.	Dynamic Mode Decomposition And Koopman Spectral Analysis Comparison In Boundary Layer Separation-Induced Transition Study	Alessandro Dotto, Daniele Simoni, Davide Lengani, Alberto Tacchella
30.	Drag Reduction Effect Of Wave-Machine-Like Traveling Waves In Turbulent Channel Flow	Yusuke Nabae, Koji Fukagata

31.	Predicting The Near-Wall Region Of Turbulence Through Convolutional Neural Networks	Luca Guastoni, Alejandro Güemes, Andrea Ianiro, Stefano Discetti, Philipp Schlatter, Hossein Azizpour, Ricardo Vinuesa, Gb Arivazhagan
32.	Thermoacoustic Instabilities Of Hydrogen-Enriched Partially Premixed Flames In A Swirl Combustor	Yu Gong, Daniel Fredrich, William Jones, Andrew Marquis
33.	A New Approach To Using Artificial Neural Networks In Les-Pdf Simulations: Application To Sydney Flame L	Tom Readshaw, Tianjie Ding, Stelios Rigopoulos
34.	Parametric Forcing Approach For Secondary Motions Formation Over Inhomogeneous Rough Surfaces	Alexander Stroh, Kay Schäfer, Bettina Frohnäpfel, Pourya Forooghi
35.	Direct Numerical Simulation On The Influence Of Slope And Skewness On Turbulent Flows Over Irregular Rough Surfaces	Yusuke Kuwata
36.	Direct Numerical Simulation Of Turbulent Heat Transfer Of Surfaces With Regularly Distributed Hemispheres	Rika Nagura, Kazuhiko Suga, Yusuke Kuwata
37.	Application Of Hybrid Meteorological Model/Engineering Les Analysis To Very Strong Typhoon Jebi 2018	Masaharu Kawaguchi, Tetsuro Tamura, Wataru Mashiko
38.	Analysis Of The Reverse Teardrop Shape Of The Velocity Gradient Tensor Invariants Joint Pdf Close To Walls In Turbulent Rayleigh- Bénard Convection	Sahin Yigit, Josef Hasslberger, Nilanjan Chakraborty, Markus Klein
39.	Assessment Of High-Resolution Numerical Simulation Of Bubble-Wall Collision	Sagy Ephrati, Paolo Cifani, Benjamin Krull, Jochen Fröhlich, Bernard Geurts
40.	A Comparison Between Head-On Quenching Of Turbulent Methane-Air And Hydrogen-Air Flames Using Detailed Chemistry Direct Numerical Simulations	Jiawei Lai, Umair Ahmed, Markus Klein, Nilanjan Chakraborty
41.	Suppression Of Either Large-Scale Modulation Or Superposition In Wall Turbulence	Andrea Andreolli, Davide Gatti, Ricardo Vinuesa, Ramis Örlü, Philipp Schlatter
42.	Artificial Neural Networks For Les Of Turbulent Combustion And Application To Sandia D Flame	Tianjie Ding, Tom Readshaw, Stelios Rigopoulos
43.	Direct Numerical Simulation Of Adverse Pressure Gradient Turbulent Boundary Layer Up To $Re_\theta \sim 8000$	Hussein Rkein, Jean-Philippe Laval
44.	Cpu-Based Deployment Of Artificial Neural Networks For Les Of Reacting Flows In Openfoam	Paola Breda, Elias Trautner, Markus Klein, Maximilian Hansinger, Michael Pfitzner

45.	Study Of Turbulent Precipitation In A T-Mixer With Dns And Dpb	Hin Yan Tang, Stelios Rigopoulos, George Papadakis
46.	A New Formulation Of Hybrid Temporal Large-Eddy Simulation	Vladimir Duffal, Benoît De Laage De Meux, Rémi Manceau
47.	Dns And Les Of A Syngas Turbulent Oxy-Flame With Side-Wall Effects Using Machine Learning Based Chemistry	Kaidi Wan, Camille Barnaud, Luc Vervisch, Pascale Domingo
48.	Combustion Regime Identification In Turbulent Flames From Machine Learning Trained By Raman/Rayleigh Line Measurements	Kaidi Wan, Sandra Hartl, Luc Vervisch, Pascale Domingo, Robert Barlow, Christian Hasse
49.	A New Linear Forcing Method For Isotropic Turbulence With Controlled Lengthscale	Jérémie Janin, Fabien Duval, Christophe Friess, Pierre Sagaut
50.	Towards Uncertainty Quantification Of Les And Urans For Internal Natural Convection - Differentially Heated Cavity Of Aspect Ratio 4	Philipp Wenig, Ruiyun Ji, Stephan Kelm, Markus Klein
51.	Les Deduced Tke And Dissipation Rate For Acoustic Modelling Of Subsonic Jets	Alex Howlett, Hao Xia, Chris Ellis, Gary Page
52.	Numerical Prediction Of Soot Formation In A Turbulent Diffusion Flame Using The Les-Pbe-Pdf Approach	Binxuan Sun, Stelios Rigopoulos
53.	Large Eddy Simulation Of Different Regimes In Canopy Flows	Shane Nicholas, Mohammad Omidyeganeh, Alfredo Pinelli
54.	Study Of Irregular Roughness In Minimal Channels	Jiasheng Yang, Alexander Stroh, Suad Jakirlic, Bettina Frohnafel, Pourya Forooghi
55.	Unsteady Interaction Between Shock Wave And Separated Boundary Layer Over A Forward/Backward-Facing Step	Weibo Hu, Stefan Hickel, Bas Van Oudheusden
56.	Numerical Simulation Of Sibilant Sound Generation Of Human Voice Using Implicit Les Of Compressible Flow And Hierarchical Grid System	Hsuehju Lu, Chunggang Li, Akiyoshi Iida, Tsukasa Yoshinaga, Kazunori Nozaki, Makoto Tsubokura
57.	Towards Les Of Bubble-Laden Channel Flows: Sub-Grid Scale Closures For Momentum Advection	Elias Trautner, Josef Hasslberger, Paolo Cifani, Roel Verstappen, Markus Klein, Theresa Trummler
58.	Data-Driven Incompletely Stirred Reactor Network Modeling Of An Aero-Engine Model Combustor	Salvatore Iavarone, Savvas Gkantonas, Andrea Giusti, Epaminondas Mastorakos
59.	Approximation Of Near-Wall Velocity Profiles At Flow Over Periodic Hills Using The Falkner-Skan Solutions	Daniel Quosdorf, Lukas Unglehart, Michael Manhart

60.	Effects Of Turbulent Boundary Layer On The Near-Wall Flame Dynamics In The Case Of Adiabatic Walls	Umair Ahmed, Nilanjan Chakraborty, Markus Klein
61.	Natural Convection Between Vertically Heated Smooth And Rough Walls Using Fully Navier-Stokes Equations Simulation	Boqi Ren, Chunggang Li, Makoto Tsubokura
62.	A New Tripping Method For Rans Simulations Of Complex Turbulent Boundary Layers	Narges Tabatabaei, Georg Fahland, Alexander Stroh, Davide Gatti, Bettina Frohnafel, Marco Atzori, Ricardo Vinuesa, Philipp Schlatter
63.	Cfd Evaluation Of Airflow Patterns Around Beach Houses With Different Wind Facing Sides	Paran Pourteimouri, Geert Campmans, Kathelijne Wijnberg, Suzanne Hulscher
64.	Turbulent Heat And Momentum Transfer In Heated And Cooled Pipe Flow With Temperature-Dependent Fluid Properties	Helfried Steiner, Lorenzo Sufrà
65.	Effect Of Thermal Boundary Conditions In Forced Convective Flow With Temperature-Dependent Material Properties	Lorenzo Sufrà, Helfried Steiner
66.	Assessment Of Cfd Approaches For The Numerical Simulation Of A 3d Single-Phase Natural Circulation Loop For Nuclear Passive Cooling Applications	Dean Wilson, Hector Iacovides, Tim Craft
67.	A Digital-Twin Population Balance Equation For Solving Soot Psd	Andrea Seltz, Alexandre Bouaniche, Pascale Domingo, Luc Vervisch
68.	Modeling Wind Direction Changes In Large-Eddy Simulations Using A Rotating Reference Frame	Anja Stieren, Srinidhi N. Gadde, Richard J. A. M. Stevens
69.	Assessment Of Chemistry Reduction In High-Pressure Spray Flames Of Oxymethylene Ethers Using Large-Eddy Simulations	Daniel Mira, Anurag Surapaneni, Eduardo J. Perez-Sanchez, Ambrus Both, Oriol Lehmkuhl, Guillaume Houzeaux
70.	Filtering And Log-Layer Mismatch In Wall-Modeled Large Eddy Simulation	Hadi Hosseinzade, Donald J. Bergstrom
71.	Dynamics Of The Shear Layers Detaching From The Front Edges And Flow Features On The Side Of A 5:1 Rectangular Cylinder	Alessandro Mariotti, Benedetto Rocchio, Elena Pasqualetto, Gianmarco Lunghi, Maria Vittoria Salvetti
72.	Transitional Ddes Study Over A Circular Cylinder And An Airfoil Profile	Özgür Yalçın, Kenan Cengiz, Yusuf Özyörük, Lars Wein, Joerg R. Seume
73.	Towards High-Fidelity Simulation Of Wall Turbulence Subjected To Conjugate Heat Transfer In Complex Geometry	Rodrigo Vicente Cruz, Eric Lamballais, Rodolphe Perrin

74.	Improved Clauser Chart Method For Decelerating Flows	Paweł Niegodajew, Artur Drózdź, Witold Elsner
75.	Decomposition Of The Two Point Correlations And The Dissipation From Filtered Data	Massimo Germano, Josef Hasslberger, Markus Klein
76.	Surface Roughness Effects On Cavity Flows	Ganesh N, Ananth Sm, Nr Vadlamani, Sriram R, K Kontis
77.	Reliability Of Large-Eddy Simulations Of The Flow Around A 5:1 Rectangular Cylinder: Sharp Vs. Rounded Front Edges	Maria Vittoria Salvetti, Benedetto Rocchio, Alessandro Mariotti
78.	Towards Adaptive Simulations Of Turbulent Wings At High Reynolds Numbers	Fermin Mallor, Alvaro Tanarro, Nicolas Offermans, Adam Peplinski, Ricardo Vinuesa, Philipp Schlatter
79.	Piv/Plif Investigation Of Unsteady Turbulent Mixing In A Model Gt-Combustor	Dmitriy Sharaborin, Alexey Savitskii, Alexey Lobasov, Dmitriy Markovich, Vladimir Dulin
80.	Radiative Modification To General Turbulent Heat Transfer Models	Simone Silvestri, Dirk Roekaerts, Rene Pecnik
81.	Numerical Investigation Of A Turbulent Reacting Kerosene Spray In Vitiated Cross-Flow	Daniel Fredrich, W. P. Jones, Andrea Giusti
82.	Unstable Phenomena Of Vertical Natural Convection In An Open-Ended Channel With Hot-Cold Wall Configuration	Chunggang Li, Makoto Tsubokura
83.	Emerging Structures Of Low Turbulent Flow In A 90° Pipe Bend	Katrin Bauer, Johannes Burkert, Rüdiger Schwarze
84.	Assessment Of Flow Prediction For The Flow Around A Finite Rectangular Prism: Influences Of The Turbulence Model And The Mesh	Xutong Zhang, Maxime Savoie, Ben Parslew, Alistair Revell
85.	Large Eddy Simulation Study Of Extended Wind Farms With Large Inter Turbine Spacing	Richard Stevens, Charles Meneveau
86.	Large Eddy Simulation Of Separating Flows On Under-Resolved Meshes	Florian Menter, Dmitry Kolmogorov, Andrey Viktorovich Garbaruk, Andrey Sergeevich Stabnikov
87.	Heat Flux Modelling In Turbulent Flows: A Scale-Resolving Rsm Study By Reference To Complementary Dns	Maximilian Bopp, Suad Jakirlic
88.	An Algebraic Lctm Transition Model	Florian Menter, Richard Lechner
89.	Can Windbreaks Increase The Power Production Of Wind Farms?	Luoqin Liu, Richard Stevens

90.	Addressing Challenges Of Confined Embedded Les	Andrew Mole, Alex Skillen, Tim Craft, Alistair Revell
91.	Global Instability In Counter-Current Round Jets - A Numerical Study	Karol Wawrzak, Andrzej Boguslawski, Artur Tyliczszak
92.	Data-Driven Modeling Of The Pressure-Strain Term In Second-Moment Closure Rans Models	Felix Köhler, Suad Jakirlic, Sebastian Wegt, Michael Schäfer
93.	Auto-Ignition In An Isotropic And Anisotropic Turbulence	Agnieszka Wawrzak, Artur Tyliczszak
94.	Les Study Of The Impact Of Fuel Composition On A Swirl Spray Flame Approaching Blow-Off	Ambrus Both, Daniel Mira, Oriol Lehmkuhl
95.	Active Flow Control Of An Aircraft In Full Stall	Oriol Lehmkuhl, Ivette Rodriguez, Adrian Lozano-Duran
96.	Effect Of Wavy Surface On Turbulent Boundary Layer Separation	Artur Drózdź, Paweł Niegodajew, Witold Elsner, Mathias Romańczyk
97.	A Wake-Triggered Double-Secondary Vortex Topology Over A Multi-Element Airfoil: A Sensitized-Rans Modelling Study	Jiangsheng Wang, Robert Maduta, Sebastian Wegt, Jinjun Wang, Suad Jakirlic
98.	Assessment Of Scale-Resolving Turbulence Models To Capture The Drag Crisis Around A Circular Cylinder At High Reynolds Numbers	Michael Mays, Sylvain Laizet, Sylvain Lardeau
99.	Application Of Large Eddy Simulation Technique To Derive Correlations Of Nusselt Numbers For Designing Exhaust Gas Systems	Yongxiang Li, Florian Ries, Kaushal Nishad, Amsini Sadiki
100.	Fluid Dynamics Of Right Ventricular Filling In The Presence Of Pulmonary Regurgitation	Francesco Capuano, Yue-Hin Loke, Laura Olivieri, Elias Balaras
101.	Numerical Simulation Of The 3d Effects Of A Morphing Wing Using Electroactive Trailing-Edge Actuators By Means Of Hybrid Turbulence Model	Abderahmane Marouf, Nikolaos Simiriotis, Jean-François Rouchon, Yannick Hoarau, Marianna Braza
102.	Adblue Spray-Wall Impingement Process And Wall Film Formation In A Scr De-Nox System: Thermal And Conversion Analysis Using Large Eddy Simulation	Kaushal Nishad, Nikhil Mutalik, Florian Ries, Yongxiang Li, Federica Ferraro, Amsini Sadiki
103.	Modelling Of Nanoparticle Synthesis From Flames	Andreas Kempf, Johannes Sellmann, Irenäus Wlokas, Patrick Wollny
104.	Effects Of Micromixing In The Near-Field Evolution Of A Chemically-Reactive Plume Behind A Ship	Savvas Gkantonas, Epaminondas Mastorakos
105.	Automatic Surface And Volume Mesh Generation For Roughness-Resolved Les Of Additive-Manufacturing Heat Exchangers	Serge Meynet, Vincent Moureau, Ghislain Lartigue, Abdellah Hadjadj

106.	Scaling And Dynamics Of Turbulence In Sparse Canopies	Akshath Sharma, Ricardo Garcia-Mayoral
107.	Simultaneous High Speed Micro Piv And Heat Flux Measurements Near Piston Top Under Tumble Enhanced Engine Condition	Eiji Yokoyama, Makoto Kamata, Masayasu Shimura, Osamu Nakabeppu, Takeshi Yokomori, Mamoru Tanahashi
108.	Effect Of Reynolds Number On Turbulent Boundary Layer Approaching Separation	Witold Elsner, Artur Drózdź, Paweł Niegodajew, Mathis Romańczyk
109.	Numerical Viscosity Model For Implicit Large Eddy Simulations Of Wall Bounded Turbulent Flows.	Omar Mahfoze, Sylvain Laizet
110.	A Simple Immersed Boundary Method For High-Fidelity Simulations Of Moving Objects On A Cartesian Mesh	Athanasios Giannenas, Sylvain Laizet, Georgios Rigas
111.	Bi-Species Zdes Computation Of A Four-Nozzle Space Launcher Configuration	Jolan Reynaud, Pierre-Elie Weiss, Sébastien Deck
112.	Large-Eddy Simulation On The Golf-Ball Aerodynamics With Different Backspin Parameter	Makoto Tsubokura
113.	The Influence Of Wall Directional Permeability On Turbulent Boundary Layer	Azadeh Jafari, Benjamin Cazzolato, Maziar Arjomandi
114.	Turbulent Wake Flow Of Light-Duty Truck: Comparison Of Les And Experiments	Jingwei Xie, Fei Wang, Chun-Ho Liu
115.	Analysis Of Mass Transfer In A Turbulent Pipe Flow Using Extended Proper Orthogonal Decomposition	Rasmus Korslund Schlander, George Papadakis, Stelios Rigopoulos
116.	Investigation Of Turbulence Statistics In Two-Phase Gas-Liquid Flow	Radouan Boukharfane, Saad Benjelloun, Matteo Parsani, Nilanjan Chakraborty
117.	Reconstruction Of 3d Meso-Scale Structures Inside A Stirred Tank From Limited Velocity Measurements	Kirill Mikhaylov, George Papadakis, Stelios Rigopoulos
118.	An Adapted One-Equation Model For Large Eddy Simulations Of Wall-Bounded Turbulent Flows	Florian Ries, Louis Dressler, Yongxiang Li, Kaushal Nishad, Amsini Sadiki
119.	Highly Resolved Near-Wall Boundary Layer Measurements In A Side-Wall Quenching Burner	Florian Zentgraf, Pascal Johe, David Escofet-Martin, Robert Barlow, Benjamin Böhm, Brian Peterson, Andreas Dreizler
120.	Reduction In The Near-Wall Turbulence By Using Micro-Cavities	Shantanu Bhat, Anton Silvestri, Benjamin Cazzolato, Maziar Arjomandi

121.	The Effect Of A Micro-Cavity Array On Burst Events In A Turbulent Boundary Layer	Van Thuan Hoang, Azadeh Jafari, Anton Silvestri, Benjamin Cazzolato, Maziar Arjomandi
122.	Numerical Investigation Of The Effect Of Humid Air On Inhaled Hygroscopic Particles In The Human Airways	Fotos Stylianou, Stavros Kassinos, Pantelis Koullapis, Constantinos Panagiotou, Charalambos Frantzis, Dimokratis Grigoriadis
123.	An Explicit Algebraic Closure For Passive Scalar-Flux: Applications In Heated Channel Flows At A Wide Range Of Reynolds Numbers	Konstantinos Panagiotou, Fotos Stylianou, Evangelos Akylas, Panos Papanastasiou, Stavros Kassinos
124.	Wall-Resolved Les Of Turbulent Flow In A Supersonic Nozzle	Romain Debroeyer, Thomas Toulorge, Michel Rasquin, Grégoire Winckelmans, Yann Bartosiewicz
125.	Detailed Chemistry Les-Cmc Simulations Of Lean Blow-Off In Kerosene Spray Flames	Jenna Foale, Andrea Giusti, Epaminondas Mastorakos
126.	Pulsed Slot Jets In Crossflow For Heat Transfer Enhancement	Rodrigo Castellanos, Gianfranco Salih, Marco Raiola, Andrea Ianiro, Stefano Discetti
127.	Effects Of Buoyancy On Turbulent Kinetic Energy Transport In Turbulent Premixed Flames	Arun Ravi Varma, Umair Ahmed, Nilanjan Chakraborty
128.	Aerosol Separation In Different Fibre Matrices Under Laminar And Turbulent Flow Conditions	Martin Sommerfeld, Manuel Taborda, Guzel Shaikhutdinova, Lars Pasternek
129.	Concentration And Preferential Orientation Of Inertial Ellipsoids In Channel Flows At $Re_{\tau}=180$ And 550	Antoine Michel, Boris Arcen
130.	Experimental Study On Torque Enhancement and Changes In Taylor-Couette Turbulence due To Wall Roughness	Yukihiro Ihara, Yasufumi Horimoto, Yasuo Kawaguchi
131.	Analysis Of Space-Time Correlations For The Two-Dimensional Periodic Hill Problem To Support The Development Of Wall Models	Margaux Boxho, Koen Hillewaert, Grégoire Winckelmans, Michel Rasquin, Thomas Toulorge, Sophie Mouriaux, Renaud Mercier
132.	Detached Eddy Simulations: Analysis Of A Limit On The Dissipation Term For Increased Stability	Lars Davidson, Christophe Friess
133.	A Study Of Turbulent Coagulation In A Jet With Discretised Population Balance And Dns	Malamas Tsagkaridis, Stelios Rigopoulos, George Papadakis
134.	Les Of Jet Flows Issuing From Long, Contracted And Orifice Type Triangular Nozzles At Various Aspect Ratios	Jakub Stempka, Łukasz Kuban, Andrzej Boguslawski, Artur Tyliczszak, Bernard Geurts
135.	Physics-Informed Neural Networks For Solving Reynolds-Averaged Navier–Stokes Equations	Hamidreza Eivazi, Philipp Schlatter, Ricardo Vinuesa

136.	Aerodynamically Driven Rupture Of A Liquid Film By Turbulent Shear Flow	Melissa Kozul, Pedro S. Costa, James R. Dawson, Luca Brandt
137.	Dns Study On Development Of Turbulent Boundary Layer In Entrance Region Of Pipe	Hirofumi Hattori, Hiroyuki Baba, Tomoya Houra, Masato Tagawa
138.	Turbulent Flow Over Rough To Smooth Surface Transition Under Adverse Pressure Gradient	Paweł Niegodajew, Witold Elsner, Artur Tyliczszak, Ewa Szymanek, Artur Drózdź
139.	On Sub-Grid Scale Modeling In A Differentially Heated Cubical Cavity Using Coarse Large Eddy Simulation	Mohamed Sayed, Abdel Dehbi, Bojan Niceno, Muhamed Hadziabic, Konstantin Mikityuk
140.	Dns Of Mass Transfer In Turbulent Bubbly Flow In A Vertical Pipe	Néstor Vinicio Balcázar Arciniega, Joaquim Rigola, Assensi Oliva
141.	Analysis Of Fine Particle Deposition In Swirl-Type Dry Powder Inhalers	Martin Sommerfeld
142.	A Novel Conservative Immersed Boundary Method For Wind Turbine Simulations	Iason Tsetoglou, Pierre Benard, Ghislain Lartigue, Vincent Moureau, Julien Reveillon
143.	Symmetry-Preserving Discretizations In Unstructured Staggered Meshes	Nicolas Valle, F.Xavier Trias, Roel Verstappen
144.	Dns Of Turbulent Impinging Jets On Rough Surfaces Using A Parametric Forcing Approach	Francesco Secchi, Davide Gatti, Bettina Frohnepfel
145.	Low-Order Modeling Of Ignition In Annular Combustors	Leo C. C. Mesquita, Roberto Ciardiello, Epaminondas Mastorakos
146.	Reynolds Average Navier-Stokes Simulations Of Atmospheric Boundary Layer Flows Around Building-Like Obstacles Using Nek5000	Dimitrios Fytanidis, Ananias Tomboulides, Ramesh Balakrishnan, Rao Kotamarthi, Paul Fischer
147.	Implementation And Validation Of An Algebraic Wall Model For Les In Nek5000	Emmanuel Gillyns, Grégoire Winckelmans, Sophia Buckingham
148.	Turbulent Channel Flow Over Ratchet-Type Roughness	Angela Busse, Oleksandr Zhdanov
149.	Direct Numerical Simulation Of The Turbulent Wind Over Waves	Federica Romoli, Andrea Cimarelli, Enrico Stalio
150.	Experimental Studies Of Free Jets Issuing From Non-Circular Nozzles	Agnieszka Pawlowska, Andrzej Bogusławski, Artur Tyliczszak
151.	The Flow Inside A Scour Hole Around A Circular Cylinder: Comparison Between Particle Image Velocimetry And Large Eddy Simulation	Ulrich Jensen, Wolfgang Schanderl, Lukas Unglehrt, Alaa Bashir, Michael Manhart

152.	A Rational Hybrid Rans-Les Approach To Prediction Of Air Flow And Pollutant Dispersion In Real Urban Configurations	Mahir Hafizović, Muhamed Hadziabdic, Bojan Niceno, Kemal Hanjalić
153.	Investigation Of Turbulence Injection Methods In Compressible Flow Solvers In Large Eddy Simulation	Magnus Carlsson, Lars Davidson, Shia-Hui Peng, Sebastian Arvidson
154.	On The Discontinuous Galerkin Iles Of Incompressible Flows	Andrea Crivellini, Alessandra Nigro
155.	Advanced Techniques For Gray Area Mitigation In Des Simulations And Their Effects On The Subsonic Round Jet Acoustic Spectra	Alexey Duben, Jesus Ruano, Joaquim Rigola, Francesc Xavier Trias
156.	Proper Sgs Heat Flux Models And Numerical Methods For Les	F.Xavier Trias, Daniel Santos, Firas Dabbagh, Andrey Gorobets, Assensi Oliva
157.	Flow Structure And Turbulence During Sweep And Ejection Events In A Heterogeneous Canopy	Lior Shig, Alex Liberzon, Ron Shnapp, Yardena Bohbot-Raviv, Valery Babin, Eyal Fattal
158.	Large Eddy Simulation Of Isothermal And Non-Isothermal Turbulent Flows In Ventilated Classrooms	Ramesh Balakrishnan, Rao Kotamarthi, Paul Fischer
159.	Unsteadiness In A Pressure-Induced Laminar Separation Bubble	Abdelouahab Mohammed-Taifour, Marlene Sanjose, Julien Weiss
160.	Cost Of Low-And High-Order Direct Numerical Simulation Of Turbulent Convection	Bernard Geurts
161.	Application Of The Ilsa Model To Passive Scalar Transport	Zvi Hantsis, Ugo Piomelli
162.	Large Eddy Simulation Of Cavity Stabilized Supersonic Flow	Christer Fureby
163.	Numerical Simulation And Experiment Of The Three-Dimensional Leading-Edge Vortex Generated By A Plunging Wing	Ankang Gao, Chris D. Cantwell, Spencer Sherwin, Onur Son, Zhijin Wang, Ismet Gursul
164.	Turbulence Over Acoustic-Liner Roughness	Stefan Hickel, Davide Modesti, Haris Shahzad
