

I have been using the services and the technical support of the EASYCONFERENCES team since 2017. So far, they have coordinated the organization of seven conferences in the IEEE Information, Intelligence, Systems and Applications series (IISA2017 through IISA2023) and three conferences in the Joint Conference on Knowledge-based Software Engineering series (JCKBSE2018 through JCKBSE2022). In all cases, my experience from our collaboration has been most pleasant. From the small conferences with 25 attendants in the JCKBSE series to the mid-sized conferences in IISA series, Petros, Nicolas, Christos, and Boyana have been fully professional, quick in their response and most effective. I am absolutely satisfied and I am looking forward to many more instances of collaboration with EASYCONFERENCES.
